

# When the Sun sextiles Ascendant in the Natal Chart

Sun sextile Ascendant

Explore what it means when the Sun and the Ascendant harmonize through a sextile aspect in your birth chart.

**SUN SEXTILE ASCENDANT**

There's a distinct air of authority and magnanimity that surrounds you, but it's not intimidating. The authority you project is not offensive, primarily due to the natural sincerity that goes with it.

Unless the Ascendant or Sun are otherwise quite challenged, most people will describe you as natural, easy to like, and friendly. People notice you more than most, but it's in a way that makes them feel at ease and comfortable.

## Some Famous People with Sun sextile Ascendant

The following charts are rated AA accuracy only because the Ascendant is very sensitive to birth times. The Sun sign is listed first, and the Ascendant sign is listed second. Note that sometimes an "out of sign" sextile occurs when the Sun or Ascendant falls late in the sign and the other point very early in a sign.

## Common Themes

In these examples, each person has a unique set of astrological placements in addition to the Sun-Ascendant sextile. As such, they manifest in different ways.

However, there are some distinctly common themes in these examples of people with this natal chart aspect, including such things as:

- ☞ a personality that others want to be around,
- ☞ a comfortable presentation,
- ☞ physical vitality, coordination, and/or dexterity

They're often described as likable, cooperative, trend-setting, or generous with a sunny disposition or shining personality.

## About the sextile aspect

*What is a sextile?* A **sextile** is an **astrological aspect** of 60 degrees and in the group of *major* aspects. Astrologers generally consider two planets or points to be sextile one another if they are approximately 55 to 65 degrees away from each other, give or take. This range depends on the orb an astrologer allows and, in this example, the orb is 5 degrees. In reality, different astrologers use different orbs.

nically with one another, making benefits and opportunities more likely. In fact, sextiles hold the potential for an intelligent use of the energies of the involved planets and points.

Sextiles are one of several aspects that astrologers consider to be harmonious, flowing, positive, supportive, or cooperative. The trine is another harmonious major aspect.

#### Sun sextile Ascendant:

You can get by in life almost by personality alone. There is a radiant, warm, attractive quality about you that others can't help responding to favorably. Usually you appear confident and clear about who you are, and it's very difficult not to notice you or feel your influence when you are around.

— Sample interpretation from the **Merlin report**.

Your ability to project liveliness, harmony and enthusiasm in your relationships is a strong asset for your creation of prosperity. Others are inspired to cooperate with you in a constructive, creative way. Your relationship with your partner will go well, and would especially lead to success if you are in business together. You have a talent for leading children's activities and for spreading cheer wherever you go.

— Sample interpretation from the *Prosperity* report.
